Figuring & Bookkeeping Machines \$125 and up

BURROUGHS

Prevent Costly Errors—Save Valuable Time

You Both Know that the Amount is Right

No more little ten cent undercharges to drain away your hard earned profits.

No overcharges with the constant danger of dissatisfied customers.

Wouldn't you like to know—not guess?

You protect your cash after you get it—why not be sure you get it?

Burroughs accuracy stops unnoticed, steady leaks in retail store profits. Only two ten-cent errors a day in adding cash sales deprive you of \$1.20 a week—\$62.40 a year. Add the value of the time lost adding figures, down and up again to make sure—your new Burroughs has paid for itself.

But it saves in many other ways too.

How about errors in your charge accounts? They are just as common there—and even more serious. They cost you money and often cause suspicion in your customers' minds. The housewife doesn't like to add up all

those sales slips at the end of the month—neither do you. But the Burroughs does it in a jiffy—and protects you both.

Retailers invested \$72,000 in this machine the first three days. Every day since the new Burroughs was announced retailers everywhere have been buying it.

There is just one reason. The Burroughs solves the big problem of profit protection that has worried thousands of progressive retailers for years.

Have a look at it on your counter. Next time the Burroughs man is near let him show you this machine. There are many other things it will do for you—too many things to crowd into one advertisement. Drop a post card to the nearest Burroughs office. There are 170 of them. Your telephone book or your banker will tell you the nearest, or just address Burroughs, Detroit, Michigan.
